

VC100-25 Vinyl Clamp Drainage System

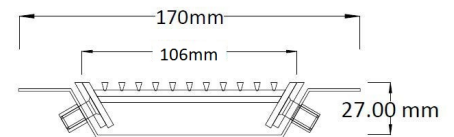

Product Description

The VC100-25 vinyl clamp allows the use of a linear drain in a vinyl floor environment. It is particularly well adapted for drainage needs in hospitals, commercial kitchens or schools. It is manufactured of 316 marine grade steel and features a wedge wire architectural style grate and channel in which a screw mechanically clamps the vinyl beneath. The VC100-25 has a 60 degree slope on the side walls, which reduces the stress on the vinyl and increases the life of the flooring surface. Load Class A.

Applications

- Bathroom
- Shower
- Special needs
- Threshold
- Wet Area Drainage
