

38G90 Special Assembly Drainage

Product Description

The Special Assembly range was developed for outdoor applications with high capacity drainage needs.

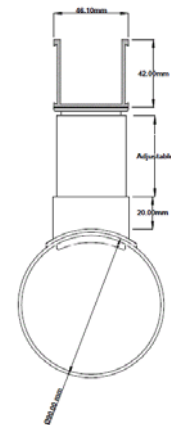

The 38G90 provides flexibility in landscape and pool design featuring a 38mm wide top drainage channel connected via downpipes at 200mm intervals to a 90mm drain pipe below.

The system is completed with a stainless steel grate from the AR40, PS40 or PH40.

Applications

- Balcony
- Courtyard / Patio
- Driveway
- Pool and pool surrounds
- Special needs
- Suspended slab
- Wet Area Drainage
