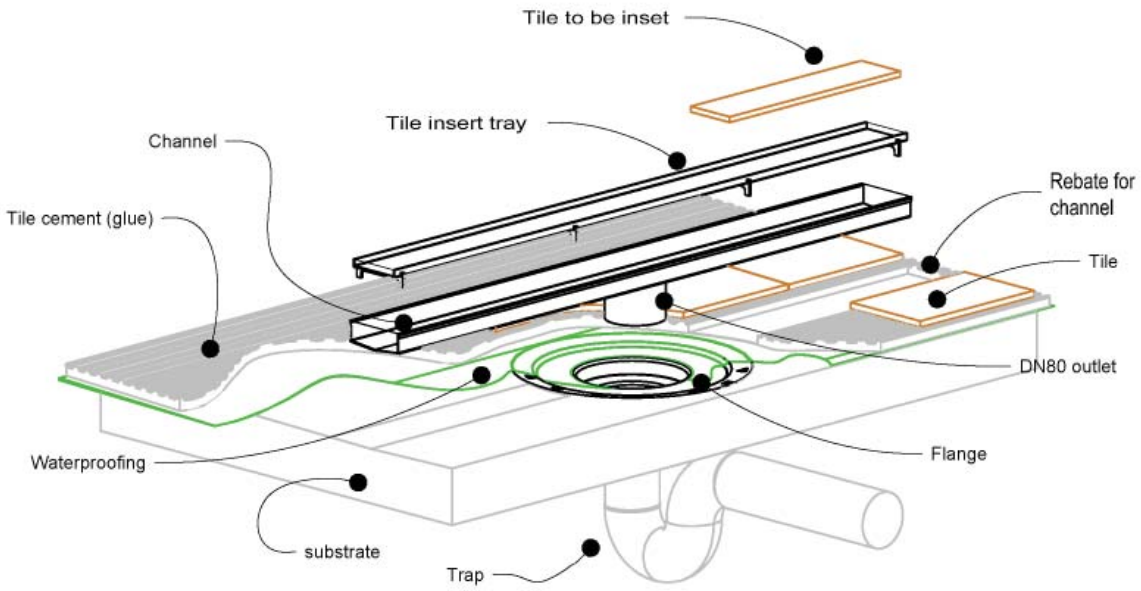
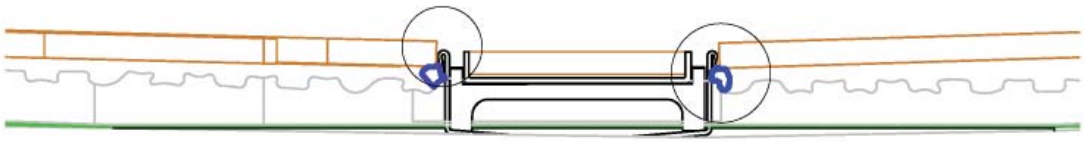
Dimensions and set-outs listed are correct at time of publication however the manufacturer distributor takes no responsibility for printing errors.

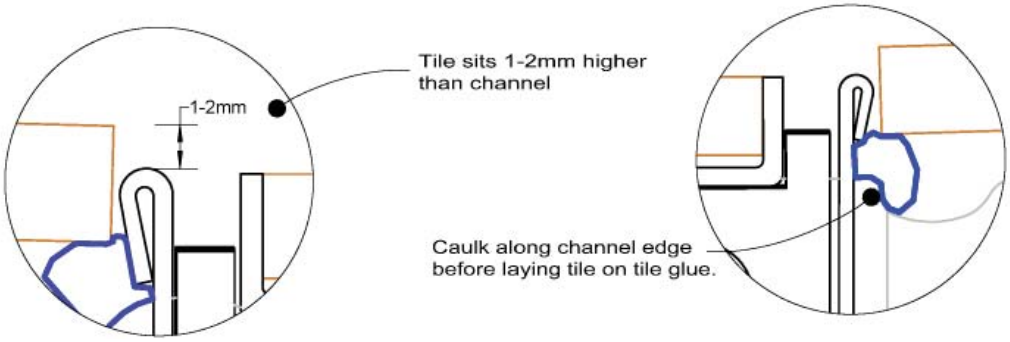
KADO
LUX SHOWER CHANNEL - TILE INSERT MADE TO LENGTH

INSTALLATION



NOTE, this method require the channel system to be ABOVE and SEPARATE from the waterproofing





- Ensure the channel is completely level
- Cut the tile 1mm narrower than the tile insert tray, i.e. 65mm.
- Ensure the inserted tile joints line up with the floor tile joints
- Using tile adheasive set the tile into the tile insert tray.

Installation and preparation of the shower or bathroom floor should be as per AS3500 and AS3740.

There are variations of acceptable installations in different jurisdictions around Australia. Check with your local regulator if you are unsure of your local requirements.

Only WaterMark certified products are allowed to be installed. Products without WaterMark certification will be deemed non compliant and removal will be required. This will likely be expensive and time consuming.
